Press Release

Parasoft at Embedded World exhibition 2019: Hall 4/ Booth 378

Parasoft C/C++test leads the industry with unparalleled support for safety and security

Monrovia (USA)/Berlin, 11 December 2018 – At Embedded World, Parasoft, the global leader in software test automation for embedded, will be demonstrating the new release of Parasoft C/C++test. It now offers the most comprehensive C/C++ development testing solution on the market for safety and security, including support for CERT C/C++, CWE, MISRA, JSF, AUTOSAR, and UL 2900. Along with its unparalleled coverage for industry coding standards, Parasoft will be showcasing its innovative approach to compliance reporting and risk assessment. The unique approach saves development time and helps organizations establish a sustainable compliance process, with dynamic, industry-specific compliance dashboards and reporting widgets that automatically generate compliance documentation adhering to the categorizations of the specific coding standards required for code audits. With Parasoft C/C++test, organizations can now benefit from a single tool for development testing best practices, security and safety compliance, and conformance documentation and reporting. Parasoft's expertise in navigating the world of security and compliance will be showcased at the session "Navigating the Jungle of Secure Coding Standards."

About Parasoft:
Parasoft provides innovative tools that automate time-consuming testing tasks and provide management with intelligent analytics necessary to focus on what matters. Parasoft technologies reduce time, effort, and cost of delivering secure, reliable, and compliant software, by integrating static and runtime analysis; unit, functional and API testing; and service virtualization. Parasoft supports software organizations as they develop and deploy applications in the embedded, enterprise and IoT markets. With developer testing tools, manager reporting/analytics and executive dashboarding,

Parasoft enables organizations to succeed in today's most strategic development initiatives – agile, continuous testing, DevOps, and security.
