**Parasoft Hosts Live Virtual Event on May 6:
Embedded Software Testing & Compliance Summit
*Industry Leaders Share Journeys to Delivering Safe & Secure
Software***

Monrovia (USA)/Berlin — April 13, 2021 – Parasoft, a global leader in automated software testing for over 30 years, today announced the Embedded Software Testing & Compliance Summit. During this free virtual event hosted by Parasoft, industry leaders will share their embedded software quality stories of overcoming safety-critical compliance and security challenges with automated software testing solutions.

[Join us on May 6, 2021 at 8 a.m. PT at this LIVE virtual summit](#) to learn about groundbreaking technologies and techniques to ensure compliance of modern embedded software.

“Companies across all industries need to have confidence in their software quality and deliver safe and secure software to their users,” said Arthur Hicken, evangelist and event moderator, Parasoft. “Many embedded software companies are turning to automated and integrated testing that includes static code analysis, unit testing, regression testing, code coverage, and requirements traceability to ensure compliance with functional safety, security, and coding standards. In this summit you’ll hear how organizations are solving real safety and security software issues.”

“With Parasoft C/C++test, I was able to implement a highly successful unit testing infrastructure and productive workflow with best practices for our organization’s software verification strategy,” said Bill Schiller, senior principal software architect and event speaker, Smiths Medical. “We selected Parasoft because of its intuitive IDE, strong market presence and great technical support team.”

Featuring a keynote from guest speaker, Bruce Douglass, a technology evangelist and high-tech embedded consultant, the 2.5 hour agenda also

includes presentations from SAAB Avionics Systems, Smiths Medical, IAR, and Renovo. All these companies share a common goal to continuously deliver safe, secure, and high-quality embedded software.

The industry leaders speaking at Parasoft's live virtual summit will cover a range of testing topics including unit testing, code compliance, data and data management essentials, and modern development workflows. Here is a preview of what they will share:

- A medical device technology company successfully adopted a unit testing solution and gained value right from the start.
- An avionic developer and manufacturer achieved code compliance and streamlined productivity.
- An automotive data platform provider delivered the first safe, secure, and scalable platform for fully autonomous vehicles.
- A software tool chain development company for embedded systems accelerated the CI/CD pipeline with build tools for Linux for Arm.

About Parasoft (www.parasoft.com):

Parasoft helps organizations continuously deliver quality software with its market-proven, integrated suite of automated software testing tools. Supporting the embedded, enterprise, and IoT markets, Parasoft's technologies reduce the time, effort, and cost of delivering secure, reliable, and compliant software by integrating everything from deep code analysis and unit testing to web UI and API testing, plus service virtualization and complete code coverage, into the delivery pipeline. Bringing all this together, Parasoft's award winning reporting and analytics dashboard delivers a centralized view of quality enabling organizations to deliver with confidence and succeed in today's most strategic ecosystems and development initiatives — cybersecure, safety-critical, agile, DevOps, and continuous testing.
