Press Release

**Parasoft partners with HackEDU to empower software developers
with context-sensitive Application Security Training**

*New partnership provides specific hands-on labs for secure coding,
critical to the security issues they are tackling in their environments*

Monrovia (USA)/Berlin – February 10, 2020 - [Parasoft](http://www.parasoft.com), the global automated software testing authority since 1987, announced today their partnership with HackEDU, an interactive cybersecurity training company. This new partnership will allow organizations to train their developers and testers on the latest threats and mitigations for modern secure software development. Parasoft offers the best in class Static Analysis Security Testing (SAST) solutions, and HackEDU provides innovative [hands-on secure coding training](#) covering the latest technologies and threats. Coupled with Parasoft, teams now get the benefit of HackEDU's training directly related to the security issues they are working on, right at the moment it's needed.

Read about how Parasoft and HackEDU's solutions scale application security efforts with limited resources in this blog post:

<https://blog.hackedu.com/top-6-application-security-must-dos-with-limited-resources>

“The reason why the industry has insecure software today is that most software developers don't understand the principles of application security. Parasoft provides the tools that testers and developers need to secure their software,” stated Arthur Hicken, Evangelist for Parasoft. “The partnership with HackEDU brings vital training and knowledge to your team, giving them the necessary skills to harden your application against today's threats.”

The community relies on training and tools for a secure software development lifecycle. Making hands-on, interactive training available inside

the tools is the most effective way for a team to address their security challenges.

When Parasoft finds security vulnerabilities, HackEDU helps developers understand how to fix the issues as well as ensure that they do not happen again. Together, Parasoft and HackEDU cover essential aspects of the Secure Software Development Lifecycle and help improve the security of software applications.

“HackEDU and Parasoft’s partnership helps give developers just-in-time training: the right training, when they need it, and in their own development environment,” said Jared Ablon, HackEDU’s CEO. “This helps busy development teams focus on training that is most relevant to them and to eliminate known vulnerabilities directly at the source.”

About HackEDU

HackEDU offers interactive Secure Coding Training online to help software developers lower the risk of vulnerabilities in code. Developers improve their ability to write secure software, boost their understanding of how software systems are hacked, and decrease the time to solve security related problems. In addition, HackEDU’s training helps meet PCI-DSS, HIPAA/HISTRUST, ISO, and NIST compliance requirements.

Security teams turn to HackEDU to help them “shift left” and be more proactive in reducing vulnerabilities in software. To learn more about HackEDU’s training offerings visit [Secure Development Training](#).

About Parasoft:

Parasoft, the global automated software testing authority since 1987, provides innovative tools that automate time-consuming testing tasks and provide management with intelligent analytics necessary to focus on what matters. Parasoft technologies reduce time, effort, and cost of delivering secure, reliable, and compliant software, by integrating static and runtime analysis; unit, functional and API testing and UI testing with Selenium; and service virtualization. Parasoft supports software organizations as they develop and deploy applications in the embedded, enterprise and IoT markets. With developer testing tools, manager reporting/analytics and executive dashboarding, Parasoft enables organizations to succeed in today’s most strategic development initiatives – agile, continuous testing, DevOps, and security.
