Press Release

Parasoft at embedded world 2023: Hall 4, Booth 4-378

Use the best software test automation solution for your organization's development

Monrovia (USA) / Berlin, Germany – February 7, 2023 - At embedded world 2023, Parasoft will demonstrate its leadership in offering the most complete support for MISRA C 2012 Amendment 3, including an early permitted draft version of MISRA C++ 202X. Parasoft C/C++test offers modern software test automation capabilities made for today's Agile DevOps workflows that seamlessly integrate into any organization's CI/CD pipeline. Additionally, Parasoft offers tight integrations within each developer's IDE and containerized deployments in support of all possible development ecosystems and use case scenarios to detect defects earlier and automatically enforce compliance with industry standards like ISO 26262, DO-178C, IEC 62304, IEC 61508, and EN 50128.

Parasoft will exhibit its unique approach to software testing and unparalleled coverage for industry coding standards in MISRA C 2012, MISRA C++ 202X, AUTOSAR C++ 14, CERT C/C++, CWE, JSF, UL 2900 and more. The automated software testing company increases productivity and quality results, which can be observed through its automatically generated compliance reports and dynamic, industry-specific analytics dashboards.

Parasoft's expertise in development and testing of embedded safety- and security-critical applications will be showcased at the EWC session, "Does MISRA Help Create Safety-Critical Systems That Use Both C & C++?"

Use the best software test automation solution for your organization's development. Visit us at Embedded World Hall 4- 378.

PARASOFT

###

About Parasoft (www.parasoft.com):

Parasoft helps organizations continuously deliver quality software with its market-proven, integrated suite of automated software testing tools. Supporting the embedded, enterprise, and IoT markets, Parasoft's technologies reduce the time, effort, and cost of delivering secure, reliable, and compliant software by integrating everything from deep code analysis and unit testing to web UI and API testing, plus service virtualization and complete code coverage, into the delivery pipeline. Bringing all this together, Parasoft's award winning reporting and analytics dashboard delivers a centralized view of quality enabling organizations to deliver with confidence and succeed in today's most strategic ecosystems and development initiatives — cybersecure, safety-critical, agile, DevOps, and continuous testing.
