Press Release

Parasoft Named a Leader in 2020 Continuous Functional Test Automation in Independent Research Report

Parasoft's Suite of Software Testing Tools With Added Smarts Recognized

Monrovia (USA)/Berlin, 23 June 2020 — Parasoft, the global leader in automated software testing for over 30 years, today announced it has been named a Leader in The Forrester Wave™: Continuous Functional Test Automation Suites, Q2 2020, conducted by Forrester Research. Parasoft's [functional testing suite](#), including SOAtest, Virtualize, and Selenic, was included in Forrester's evaluation process.

According to the report, "Parasoft's continuous testing shines in API testing, service virtualization and integration testing, and the combined automation context. Finally, Parasoft has very strong continuous integration/continuous delivery (CI/CD) and application lifecycle management (ALM) platform integration as well as reporting through its analytics system PIE (Process Intelligence Engine)."

Forrester evaluated the 15 most significant continuous functional test automation (CFTA) providers. They researched, analyzed, and scored each one using their 26-criterion evaluation. In the report, Parasoft is recognized as the "go-to testing platform for developers and still is one of their preferred choices," while also adding capabilities targeted for less technical teammates.

"We're honored to be recognized by Forrester as a leader in this evaluation. We believe this acknowledgment demonstrates our continued commitment to bring innovations that drive high levels of test automation and build long-standing partnerships with our clients," said Elizabeth Kolawa, President and CEO of Parasoft.

Parasoft continues to invest in enhancements for their automated testing tools. As stated in the report, "Parasoft is executing on its strong, committed AI roadmap that it outlined in 2018 and has plans to infuse AI and ML at all layers of the testing pyramid." Forrester's analyst report goes on to say, "clients looking for a genuine partner in testing, with strong and long-living roots in the testing space and complex technical systems to test, should take a serious look at Parasoft."

Find out more about why Forrester named Parasoft a Leader in The Forrester Wave™, which is authored by Diego LoGiudice, Vice President, Principal Analyst Serving Application Development & Delivery Professionals. Request the full Forrester report [here](#).

About Parasoft:

Parasoft, the global automated software testing authority since 1987, provides innovative tools that automate time-consuming testing tasks and provide management with intelligent analytics necessary to focus on what matters. Parasoft technologies reduce time, effort, and cost of delivering secure, reliable, and compliant software, by integrating static and runtime analysis; unit, functional and API testing and UI testing with Selenium; and service virtualization. Parasoft supports software organizations as they develop and deploy applications in the embedded, enterprise and IoT markets. With developer testing tools, manager reporting/analytics and executive dashboarding, Parasoft enables organizations to succeed in today's most strategic development initiatives – agile, continuous testing, DevOps, and security.
