Press Release

Parasoft recognized as a March 2019 Gartner Peer Insight Customers' Choice for Software Test Automation

The Gartner Peer Insights Customers' Choice Distinction is based on feedback and ratings from end-users who have leveraged Parasoft solutions

Monrovia (USA) - March 21, 2019 – Parasoft, the leader in Continuous Quality, today announced that it has been named a [March 2019 Gartner Peer Insights Customer's Choice for Software Test Automation](#). Gartner defines the Software Test Automation market as “tools, technologies, components that together constitute the critical elements of automated testing. It includes tools for performing static code analysis, functional testing, and load and performance testing in an automated way.” The Gartner Peer Insights Customers' Choice recognition maintains rigorous criteria, taking into account the number of vendor reviews and overall user ratings, and recognizing vendors with a high customer satisfaction rate.

“Customer success is at the core of Parasoft’s values, and we believe this recognition validates our continued commitment to the success of our customers,” shared Elizabeth Kolawa, CEO of Parasoft. “Our ongoing innovations are focused on reducing technical barriers and helping our customers meet the newest software development demands to ensure the continuous delivery of quality software at the speed of agile. We are extremely grateful for the feedback our customers have shared with us on Gartner Peer Insights.”

For the last 30 years, Parasoft has been relentlessly committed to software quality, innovating to push the boundaries of test automation. Parasoft enables continuous quality across the entire software development process with a portfolio of tools that help organizations easily build and scale comprehensive end-to-end testing strategies and support today’s most

complex and strategic initiatives such as CI/CD, BDD, Open Banking, Microservices, Agile, DevOps, and more. Feedback from customers in Gartner Peer Insights indicated that Parasoft solutions “[[fulfill a variety of testing needs from simple to complex](#),” “[[help \[us\] accelerate CI/CD pipeline creation](#),” and are “[[very powerful API Testing tool with a friendly UI and outstanding support](#).”

About Peer Insights:

Peer Insights is an online platform of ratings and reviews of IT software and services that are written and read by IT professionals and technology decision-makers. The goal is to help IT leaders make more insightful purchase decisions and help technology providers improve their products by receiving objective, unbiased feedback from their customers. Gartner Peer Insights includes more than 70,000 verified reviews in more than 200 markets. For more information, please visit www.gartner.com/reviews/home.

Gartner Peer Insights Customers’ Choice constitute the subjective opinions of individual end-user reviews, ratings, and data applied against a documented methodology; they neither represent the views of, nor constitute an endorsement by, Gartner or its affiliates.

About Parasoft:

Parasoft provides innovative tools that automate time-consuming testing tasks and provide management with intelligent analytics necessary to focus on what matters. Parasoft’s technologies reduce the time, effort, and cost of delivering secure, reliable, and compliant software, by integrating static and runtime analysis; unit, functional, and API testing; and service virtualization. Parasoft supports software organizations as they develop and deploy applications in the embedded, enterprise and IoT markets. With developer testing tools, manager reporting/analytics, and executive dashboarding, Parasoft enables organizations to succeed in today’s most strategic development initiatives — agile, continuous testing, DevOps, and security. www.parasoft.com
