

Press release

## **RTI at VECS – Booth #C01:24**

### **Showcases Proven Communication Framework for SDVs**

*Accelerate Development with Connex Drive – Powering Over a Million Vehicles  
on the Road Today*

**SUNNYVALE (USA)/London – March 06, 2025**– [Real-Time Innovations \(RTI\)](#), the infrastructure software company for smart-world systems, will exhibit at [Vehicle Electronics & Connected Services \(VECS\)](#) 2025, held March 18–19 in Gothenburg, Sweden. At booth #C01:24, RTI will showcase [Connex Drive®](#), the proven communication framework for software-defined vehicles (SDVs).

Based on the [Data Distribution Service \(DDS™\) standard](#), Connex Drive enables seamless data sharing across vehicle architectures, decoupling applications from hardware to accelerate development and streamline integration. Trusted by leading OEMs and Tier 1 suppliers, Connex Drive supports scalable, safety-certified solutions for E/E architectures, ADAS, and fleet-wide data management. With ASPICE CL1, ISO 21434, and ISO 26262 [certifications](#), it ensures reliability and compliance for next-generation vehicle systems.

At [VECS](#), Tobias Fieger, Global Business Development Manager Automotive at RTI, will present "Towards SDV: Decoupling Applications from Hardware with DDS" on March 19 at 13:20 CET in Track F. This session will explore how DDS allows developers to focus on application logic by abstracting hardware specifics, enabling asynchronous communication, and providing fine-grained control over data delivery, reliability, and latency.

RTI's automotive experts will also be available to discuss how a data-centric approach simplifies and streamlines next-generation vehicle connectivity. For more information about RTI at VECS or to schedule a meeting with the team, please visit [this link](#).

### **Event Details**

**What:** RTI at VECS 2025, Booth #C01:24

**When:** March 18–19, 2025

**Where:** The Swedish Exhibition & Congress Centre, Mössans gata 20, 412 51 Gothenburg, Sweden

###

**About RTI ([www.rti.com](http://www.rti.com)):**

Real-Time Innovations (RTI) is the infrastructure software company for smart-world systems. RTI Connex<sup>®</sup> is the world's leading software framework for intelligent distributed systems. Uniquely, Connex users can build systems that combine advanced sensing, fast control, and AI algorithms.

RTI is the market leader in products compliant with the Data Distribution Service (DDS) standard. With 2,000 customer designs, RTI excels at getting customers to production.

RTI software runs over 250 autonomous vehicle programs, supports dozens of automotive ADAS and software-defined architectures, controls the largest power plants in North America, integrates over 400 major defense programs, drives a new generation of MedTech systems and robotics, and underlies Canada's air-traffic control and NASA's launch control systems.

RTI runs a smarter world.

RTI is privately held and headquartered in Silicon Valley with regional offices in Colorado, Spain, and Singapore.
